

### **Welcome to the world of colours:**

We develop “green inks” in black and, under certain conditions, blue ink can even become red. Technically speaking we develop and manufacture pigment preparations, digital printing inks and ink specialties for our customers worldwide. Our work is driven by sustainability and creativity. We have plenty of development projects and need your ideas because here YOU develop the colours and inks of the future!

**We count on your personal contribution and are looking for YOU (male/female/other)\* at the earliest opportunity to work on your:**

## ***Thesis (Bachelor/Master) / Internship***

*Sustainable inks / Renewable additives / Digital printing inks*

### **Key points**

- Development of sustainable inks for various inkjet applications,
- Development of renewable ingredients for digital printing inks,
- Analysis and control of the rheological features of ink systems.

### **prometho offers**

- An uncomplicated & family atmosphere:  
Having breakfast, cooking and having barbecues together, joint activities, Christmas party,
- Direct daily exchanges, regular project meetings and furthermore we offer support, e.g. in looking for somewhere to live.
- Acting sustainably: Sponsor a bee hive and help create our prometho garden or introduce a new activity yourself.
- Training activities to promote and maintain health care: Create your work place, support in fitness offers, company run and much more...
- Remuneration for writing the thesis and the prospect of further employment.

*\*The important thing is, you are right for us and we are right for you. Gender, skin colour, religion and other characteristics are of no importance.*

Please send your written application as a pdf by e-mail to:
